

DIGITAL MARKETING INTERNSHIP

WEEK 02

Prepared by: Jamila Haider

Date: 15-07-2026

TASK 03:

Competitor Analysis:

Business selected: Food Brands

For this analysis, I studied two well-known restaurants operating in Rawalpindi and Islamabad: Anarkali Restaurant and Savour Foods. I examined their meta titles, meta descriptions, target keywords, website structure, content strategy, and overall SEO approach.

Detailed Analysis

1. Anarkali Restaurant

Website	anarkalirestaurant.com.pk
Meta Title	Anarkali Restaurant Online Ordering Delivery in Islamabad & Rawalpindi
Meta Description	Explore Delicious Desi & Fast Food items by Anarkali Restaurant in Islamabad & Rawalpindi. Order now to get it delivered to your home.

Target Keywords

- anarkali restaurant
- desi food delivery Rawalpindi
- fast food Islamabad
- online food order Rawalpindi

Website Structure

Homepage, Menu, Online Order, Contact. Clean navigation. Google Maps embedded. Mobile-friendly.

Blog Strategy

No active blog missing a major SEO opportunity for informational keyword traffic.

Strengths

- Strong brand name with high search volume for branded keyword
- Covers both Islamabad and Rawalpindi, double the local audience
- Online ordering system directly on website, reduces friction to convert
- Meta title clearly states value proposition (online ordering + delivery)

Weaknesses

- No blog = no informational keyword traffic
- Meta description is generic, doesn't include a strong CTA
- Limited content on homepage, not enough text for Google to fully understand the page
- No mention of specific dishes in title/meta, misses dish-specific keyword traffic

2. Savour Foods

Website	savourfoods.com.pk
Meta Title	Savour Foods — Famous Pulao & Desi Food Restaurant Pakistan
Meta Description	Savour Foods is Pakistan's most famous pulao restaurant, serving authentic desi cuisine since 1975 in Rawalpindi and Islamabad.

Target Keywords

- savour foods
- pulao Rawalpindi
- famous restaurant Rawalpindi
- desi food Pakistan
- best pulao Pakistan

Website Structure

Homepage, Menu, Branches, Gallery, Contact. Strong brand authority. Multiple branch pages for local SEO. High-quality photography.

Blog Strategy

Minimal blog presence. Occasional posts but not consistent — missing ongoing SEO value.

Strengths

- Extremely strong brand authority, ranks for 'best pulao Pakistan' nationally
- Est. 1975 mentioned prominently — builds massive trust (E-E-A-T)
- Multiple branch location pages boost local SEO across cities
- High-quality food photography drives engagement and time-on-page

Weaknesses

- Blog is inconsistent, no regular content publishing schedule
- Social media links not prominently featured on homepage

Overall Market Opportunities

Based on this competitor analysis, two major SEO opportunities exist in the Rawalpindi restaurant market that none of the competitors are currently exploiting well:

- **Blog content gap:** None of the two competitors maintain an active, consistent blog. A restaurant that publishes weekly content around keywords like 'best biryani in Rawalpindi', 'Pakistani food recipes', and 'desi food guide' could capture significant informational search traffic that competitors are completely ignoring.
- **Dish-specific landing pages:** No competitor has dedicated SEO-optimized pages for individual dishes (e.g. /biryani-rawalpindi, /karahi-rawalpindi). These long-tail pages with low KD represent a significant untapped traffic source.
- **Mobile speed:** All two competitors have room for improvement in mobile speed. A fast, mobile-first website would rank better and reduce bounce rate directly improving both SEO and conversions.
